

AVIATION CONSULTING & COMPLIANCE

Modern aviation operations, built on stronger documentation.

A practical capability guide to DGCA-focused documentation, compliance support, safety and operational excellence.

20 YEARS

DGCA-FOCUSED

24 x 7 SUPPORT

INSPECTION READY

Airline expertise. Regulatory clarity. Results that endure.

ThinkPOD Consulting combines two decades of airline-operations experience with a practical understanding of regulatory approvals, controlled documentation and frontline workflows.

DOCUMENTATION AS AN OPERATING SYSTEM	REGULATORY ALIGNMENT
An airline manual is more than a submission. It coordinates dispatchers, crew, safety teams, engineers, ground personnel and accountable management. We create documentation that is readable, controlled and usable in real operations.	Our work translates applicable DGCA Civil Aviation Requirements into policies, procedures, evidence and revision controls that are current, traceable and inspection-ready.
PRACTICAL DELIVERY	CONFIDENTIAL PARTNERSHIP
Engagements move from initial review and gap analysis through authoring, operator feedback, finalisation and support during regulatory observations or inspections.	Operator information is handled with strict confidentiality. Solutions are tailored to fleet, network, approval stage and organisational responsibilities rather than built from generic templates.

Operations, safety and airworthiness documentation

Connected documentation prevents conflicting procedures and creates one controlled system across flight, safety, engineering, training and ground functions.

01

Operations Manuals

Operator-specific Operations Manual Parts A, B, C and D, authored or re-authored to reflect actual approvals, fleet, network and accountable responsibilities.

- SOP development and standardisation
- Flight Dispatch and Ground Operations Manuals
- Company forms, checklists and regulatory references

02

Safety Documentation

A coordinated safety-documentation framework that supports hazard identification, risk control, reporting, investigation and management assurance.

- Safety Management System and Flight Safety Manual
- FSDS and Emergency Response Plan
- Risk assessment procedures and safety reporting systems

03

Continuing Airworthiness

Documentation that connects maintenance control, reliability, engineering processes and operator continuing-airworthiness responsibilities.

- CAR-M and CAMO documentation
- Continuing Airworthiness Exposition
- MEL/CDL review, engineering procedures and control forms

04

Flight Operations Documentation

Clear procedures for planning, dispatch, crew execution and ground coordination, with controlled integration of manufacturer source material.

- Flight Dispatch and Ground Operations Manuals
- Dangerous Goods, security and crew training manuals
- OEM integration: AFM, QRH, AOM, FCTM and SOPM

From regulatory intent to inspection readiness

ThinkPOD helps operators identify gaps, establish evidence, close observations and maintain controlled documentation that reflects the approved operation.

☐ CAR-M / CAMO implementation	☐ Documentation gap analysis
☐ Flight Safety Documentation System enhancement	☐ DGCA inspection readiness
☐ Operations Manual revision	☐ Regulatory review and compliance monitoring
☐ Safety Management System enhancement	☐ Internal compliance audits

OUR DOCUMENTATION PORTFOLIO

01 Operations Manuals (OM A-D)	02 SMS Manual	03 Flight Safety Manual
04 FSDS Documentation	05 Emergency Response Plan	06 MEL / CDL Documentation
07 Ground Operations Manual	08 Flight Dispatch Manual	09 Training Manuals
10 Security Programme	11 Dangerous Goods Manual	12 Cabin Crew Manual
13 CAMO Documentation	14 Engineering Procedures	15 SOPs
16 Company Forms & Checklists	17 OEM / QRH References	18 Quality Assurance Manual
19 Airfield Operating Minima	20 GRF Documentation	21 All Regulatory Forms

Structured delivery from review to regulator support

A disciplined eight-stage process keeps stakeholders informed and documentation controlled from discovery through approval and ongoing readiness.

01

Initial Documentation Review

Collect current manuals, approvals, fleet and organisational information to establish scope and baseline.

02

Gap Analysis

Compare the present state with applicable requirements, accepted practices and operational needs.

03

Regulatory Assessment

Prioritise compliance exposure, dependencies, documentary evidence and approval considerations.

04

Manual Authoring / Re-authoring

Develop clear policies, responsibilities and procedures aligned to the operator's actual system.

05

Internal Review

Check accuracy, consistency, cross-references, traceability, usability and document control.

06

Operator Feedback

Incorporate feedback from accountable management, nominated post holders and operational users.

07

Final Documentation

Issue a clean, controlled suite prepared for submission, implementation and internal communication.

08

DGCA Inspection Support

Support observations, evidence requests, corrective actions, amendments and continuing readiness.

Compliance beyond documentation

Practical, user-friendly and inspection-ready systems improve safety, standardisation, operational reliability and management confidence.

01 Aviation Expertise Experienced professionals with airline and regulatory backgrounds understand how approved procedures must work in daily operations.	02 Customised Solutions Every engagement is tailored to fleet, operation, approval stage, organisation and accountable responsibilities.
03 Practical Documentation Operationally usable manuals are written for the people who execute, supervise and assure the process.	04 Regulatory Expertise Applicable DGCA CARs and amendments are translated into clear requirements, evidence and controls.
05 Inspection Ready Structured content, traceability and evidence organisation support efficient inspections and observation closure.	06 Quality & Confidentiality Deliverables undergo controlled review while sensitive operator information remains protected.
07 Faster Turnaround Defined scope, clear ownership and planned review cycles keep work moving without sacrificing quality.	08 End-to-End Support Support continues from gap analysis and authoring through approval, amendments, audits and ongoing compliance.

OPERATORS WE SUPPORT

Non-Scheduled Operators (NSOPs)	Scheduled Airlines	Corporate Flight Departments
Charter & Private Operators	Helicopter Operators	Air Ambulance Operators
FTOs / ATOs / GTOs	CAMOs, MROs & Maintenance Organisations	Aviation Start-ups

TRANSFORM YOUR OPERATIONS

Combine expert aviation consulting with practical regulatory delivery.

Whether the requirement is a complete documentation suite, DGCA inspection preparation, continuing-airworthiness support or operational standardisation, ThinkPOD can help define a practical route forward.
